Full stack web developer with 4+ years of experience. Independent and fast learner. I enjoy the satisfaction of developing great software and solving complex problems.

Experience

- Full Stack Web Developer, Convizit via Abra January 2022 - Present
 - Designed and developed a unique user application from scratch to production, that mounts on any website, visualizing live and aggregated data while enabling editing and customization
 - Developed user behavior tracking algorithms using browser APIs, advanced DOM manipulation techniques, while assuring browser compatibility and performance
 - Developed BE microservices meant for authentication, user management and data manipulation and customization
 - Improved code maintainability by refactoring old code bases and implementing clean code best practices
 - Developed a shared UI components package using Storybook, to remove duplications and unite styles across different applications
 - Participated in a successful team effort to reduce the number of bugs in the system from over 40 to almost nothing in several months
 - Increased tests coverage and made significant improvements to tests infrastructure using Cypress and Cucumber
- Full Stack Web Developer, Flowbiz August 2019 - January 2022
 - Boost performance and improved code readability and organization by migrating our front end wizard application from AngularJS to React, using a TDD approach
 - Reduced development time by automating tests generation from JSON data files to Protractor tests
 - Ensured quality code delivery by creating CI/CD pipelines from development through staging, to production
 - Ensured high standard development and code writing according to best practices by creating a number of customized application starters, using a range of various technologies, and including all the different layers of the needed stack such as state management, authentication, testing, documentation generation, and style libraries
- IT Consultant and Web Developer, IsraelMM 2019 - 2022
 - Designed, developed and maintained a full stack application to analyze, visualize, and manage data of a governmental funded project to enhance circular economy in various industries. Built using NodeJS (Express), React and PostgreSQL

Education

- MA in Political Philosophy, Tel Aviv University, Tel Aviv 2015 - 2018
 - Graduated summa cum laude, with a perfect score on my thesis paper
- BA in Philosophy, Tel Aviv University, Tel Aviv 2010 - 2014
 - Majored in political theory and philosophical and mathematical logic

Skills

- Javascript
- Typescript
- React.js
